

Department of Statistics SAS Training...

I. An Introduction to SAS: SAS Basics for Windows Users.

This course will familiarize you with SAS for PC, version 9.4. It will introduce you to the basic concepts of the SAS system necessary for reading, manipulating, listing, and analyzing your data using SAS statements in the DATA and PROC steps of SAS system. No previous experience with SAS is required, however, basic keyboarding skills are recommended

This training session will meet Tuesday September 12, 2017 from 6:00-8:00 P.M. in Hardin Hall (East Campus), Room 49

II. Beyond SAS Basics: Techniques for the Intermediate Level SAS User.

This course is designed for persons who have advanced beyond the level of the novice user. Topics covered include: types of input statements, use of assignment statements and function, use of IF-THEN/ELSE statements, arrays, reading data from external files, use of permanent SAS data sets, and displaying information about SAS data sets. Introduction to SAS or previous experience with SAS is required.

This training session will meet Wednesday September 13, 2017 from 6:30-8:00 P.M. in Hardin Hall (East Campus), RM 49
